Professional and life objective:

Create new ways and innovative solutions to people's everyday problems with the use of cutting-edge technology. Surround myself with different people from various areas of expertise and collaborate together to resolve today issues and create a positive and helpful impact on society.

ACADEMIC BACKGROUND:

2017-2018	Post-Bachelor Degree in Corporate Finance Universidad Panamericana, Mexico City
2013-2017	Bachelor's Degree in Accounting Universidad Panamericana, Mexico City
2000-2012	Primary, High School Liceo Mexicano Japones, A.C.

WORKING EXPERIENCE:

2016-2018	Tax Analyst Grupo Farmacos Especializados
-----------	---

Mexican pharmaceutical retailer company specialist on the selling of medicine and medical equipment to government and private entities.

I worked as a tax analyst, having as primary activities:

- Monthly and annually tax calculations.
- Legal tax planning to help the company reduce its tax payments.
- Record of the dividends and capital reductions given to the shareholders.
- Incorporation of new companies.
- Revision of related parties' contracts and transfer pricing studies.
- Participate on the planning of corporate restructures.

- Revision of Tax Reports.

Major accomplishments:

- Being involved in the mergers of various of the group's companies.
- Being involved in the tax planning for distribution of dividends to the shareholders.

March 2019-present Innovation and Technology Leader
BHR Mexico

Ninth biggest accountants, lawyers and consultants' firm in Mexico. Having clients from any kind of industry including worldwide known companies such as Samsonite, Universal Pictures and others from countries like China, India, USA and Japan.

My main activities are:

- Be in charge of the Innovation and Technology Department which focuses on the development of systems to sell and self-implement for the firm.
- Planning of new technological systems focused on the needs of companies and for the firm self-implementation.
- Keep in touch with possible customers to arrange meetings in order to negotiate and sell the firm's wide range of services.

Major accomplishments:

- Planning of a tax calculation system that started selling in 2020.
- Planning of a Human Resources system which will help on the better management of the worker's data and reduction of the time consumption from the Human Resources Department tasks.
- Development of the 2019's Innovation and Technology Contest from where 1 major technological project came up that will have the effects of cutting expenses, reducing the time consumption on administrative tasks and improving the accuracy of the accounting reports.
- Being involved with partners and managers in the negotiation on the selling of the firm's services.
- In 2020, after 1 year of good work and accomplishments, the Managing Partner of the firm gave me task of managing the newly developed Training Department in which, with the help of 2 other employees, we came up with a 1-year training plan for the 100 employees in Mexico City and that have had great results according to the feedback
